Let's play

Sliding is a favorite playground activity that attracts children to being active and playful in a thrilling way. This sturdy slide will delight children and encourage them to be brave and enthusiastic on the playground, for hours of imaginative and active play. When children slide they train their core muscles, sitting upright while sliding down. This stimulates their

trunk stability, important for avoiding back and neck pains – a growing problem in children due to sedentary lifestyles. Additionally, sliding trains the child's sense of balance and spatial understanding. These skills are important in navigating the world securely. They are the fundament of all motor skills and thus a fundament in physical confidence in the child.

Panelen van 19mm EcoCore™. EcoCore™ is een zeer duurzaam, milieuvriendelijk materiaal, dat niet alleen recyclebaar is na gebruik, maar ook bestaat uit een kern die is gemaakt van 100% gerecycled materiaal.

De glijbaan is gemaakt van gegoten PE. PE heeft een uitstekende slagvastheid en is bruikbaar binnen een groot temperatuurbereik.

De treden zijn gemaakt van PUR. Het behoudt zijn eigenschappen in het temperatuurbereik van -30°C tot 60°C. Het materiaal is UV gestabiliseerd.

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with lowest possible CO2e emission factor such as EcoCore™ panels of 100% post consumer recycled ocean waste.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
