The quirky look of the fabulous Multispinner Carousel attracts children to try it out again and again. Easily accessible due to its inclination having one lower and one higher end, the Multispinner embraces both younger and older children. The bowls make comfortable seating options. The middle part is a show-of stage for those with extremely good balance skills. With

great cooperation skills, the Multispinner can be spun from seated position, having children coordinate their swinging movements, leaning forwards and backwards in an agreed rhythm. Thus the Multispinner, apart from being great fun, trains cooperation and team work. The spinning movement is a great training of the vestibular system, the sense of balance in

particular. The sense of balance is fundamental to for instance the ability to sit still on a chair, concentrating. In other words, the Multispinner is great play with a purpose.

The GreenLine Multispinner base and bowl in dark teal color are designed with molded PP parts which consist of 25% recycled post consumer waste and 75% virgin material. GreenLine ensures the lowest possible CO2e emission factor.

The bowls are made of recyclable PE. The bowls are moulded in one piece with integrated metal thread bushings and water drain hole to ensure high durability in all climates around the world.

Heavy-duty engineered bearing system with single row deep groove ball bearings with rubber seals. The fully closed bearing has lifetime lubricated and maintenance free.

The steel surfaces are hot-dip galvanized inside and outside with lead-free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

The Multispinner carousel is offered in three different color combination. Two with a grey base and a third GreenLine version in dark teal color.

GreenLine versions in dark teal color are designed with molded PP parts which consist of 25% recycled post consumer waste and 75% virgin material. GreenLine ensures the lowest possible CO2e emission factor.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
