The Double Springer is a whimsical and attractive springer for two. It attracts players again and again, thanks to the combined play invitation for movement and social interaction. The attraction of rocking together is very much based in the movement response and the opportunity for friendly rough-and-tumble play with a friend. The carved handholds and

inclined foot supports invite a seated position with a low handhold. This makes rocking together a fun challenge. Furthermore the arm and leg muscles get ample use and training. It trains the sense of rhythm and the coordination. These are crucial motor skills that help children navigate the world securely, e.g. in the street when estimating time, movement

and objects. The social dimension and the cooperation with friends train social-emotional life skills such as taking turns and cooperation. Empathy is trained as well, as players consider others' limits and limitations.

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
