The Ocean Multi Seesaw motivates children to join in play, rocking together. The spacious design and sturdy back and foot support allow for many children of all abilities playing together. The risk seekers can stand on the middle platform securely, sensing the movement of the others. The spacious platform also allows for socializing and children lying or

sitting. There is room enough for caregivers, too. The seats at the end are big enough for older children as well as adults. The fun thrill of rocking, individually, in small or in big groups, will make children return for more. Rocking on the Ocean Multi Seesaw trains the children's muscles and motor skills, their balance and coordination. The spaciousness of the seesaw

supports development of social-emotional skills, e.g. cooperation, consideration and turn-taking. Toddlers experience cause-and-effect understanding.

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material.

KOMPAN Springs are made of high quality spring steel according to EN10270. The springs are cleaned by phosphating before they are painted with an epoxy primer and a polyester powder coating as top finish. The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

The springs are fixed by unique anti pinch fittings for maximum safety and long lifetime.

The steel support posts are hot dip galvanized inside and outside with lead free zinc. The galvanization has excellent corrosion resistance in outside environments and requires low maintenance.

Platform and seats are made of HPL with a thickness of 17.8mm with a very high wearing strength and a unique KOMPAN nonskid surface texture.

KOMPAN GreenLine versions are designed with the most environmentally friendly materials with the lowest possible CO2e emission factor such as EcoCore™ panels of 100% post-consumer recycled ocean waste.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
