This toddler-sized Labyrinth with 3 Rooms will provide hours of fun for young children. The carefully designed structure offers play opportunities in all areas: physical, social-emotional, cognitive, and creative. Children will enjoy moving their bodies in and out as well as around the structure. The thoughtfully placed rubber knee-protectors placed in the crawl-

through openings welcome this behavior. These motions support important physical as well as spatial understanding skills. The open 360 design also supports cooperation and parallel play, which develops the social-emotional skills of the child. A rich variety of open-ended sensory elements including the mega-phone, bubble window, play spheres and

play rings stimulate the understanding of cause and effect, through movement and sound, strongly supporting cognitive development in the young child.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
