Wow! Children are immensely attracted to the activity of the Green House & Florist. In a small space, children play intensely, again and again. Loaded with play, the play unit benefits the children's physical, social-emotional, cognitive and creative development. Numerous play features encourage social play as they unite children with tangible, cross-panel play

activities: the tube, sand scoop and string with knob. The Green House & Florist has tangible themes: switch, bell, scoops making sounds when run in the toothed grooves, see-through flower vases. These scaffold logical thinking skills as children push, pull and investigate the numerous play items stimulate the child's logical thinking skills. The rich themes in-spire

dramatic play, which is phenomenal for language development: a main factor for learning, friendships and life success.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
