

# Inclusive Seat, H:2.5m, 4-Chain

SW990208

| Item no.                    |   |
|-----------------------------|---|
| General Product Information |   |
| Dimensions LxWxH            | 0x0x0 cm  |
| Age group                   | 6+  |
| Play capacity (users)       | 1   |
| Colour options              |  |

Of all the play activities, swinging is a favorite: children love it, as it can be done individually and together for hours and days. The seat is universal design, welcoming users of all ages and abilities. Swinging, apart from being tremendous fun, trains the children's balance and coordination, as well as their spatial awareness. These motor skills are crucial for

being able to judge distances and navigate the body securely through street traffic. Swinging additionally trains the arm, leg and core muscles. It is a fundamental bonding activity for those pushing the swing into motion and those seated securely in it. The soothing and swinging motions support social-emotional development of among others daring, empathy

and turn taking.

### Validation of CO<sub>2</sub> calculation of: Freestanding play equipment

Data version no. 2021-09-27

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Freestanding play equipment" represented by item no.: KSW92011-0910.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).

**Date: 15. October 2021 | Valid until: 15. October 2023**

| Cradle to Gate A1-A3 | Total CO <sub>2</sub> emission | CO <sub>2</sub> e/kg    | Recycled materials |
|----------------------|--------------------------------|-------------------------|--------------------|
|                      | kg CO <sub>2</sub> e           | kg CO <sub>2</sub> e/kg | %                  |
|                      |                                |                         |                    |

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
